““An elegant proposal that combines design and great comfort””

“An elegant proposal that combines design and great comfort”. Alice is an elegant proposal that combines sinuous design, thickness control and great comfort. Characterized by thin thicknesses despite the extreme comfort of the seats, this collection is of great elegance. A sign of great contemporaneity and classicism at the same time, Alice is light and its space footprint is absolutely free of impact of both masses and heavy volumes, even in the larger three or four-seater solutions.
