

Hamac By Amura

VOYAGER

“Hamac is almost a manifesto of technological innovation created by SaintLuc”

Seduced by the opportunity to help exploit the potential of linen fiber in the furniture sector, the Nuel studio has placed the material at the center of its project. The starring of this seating collection is linen interpreted in its original essence. The seat shell, in fact, was conceived as a drape resting on a wooden structure, as if it were a soft fabric present under the resin, as if time had suspended its motion. The wooden structure, simple and linear, welcomes the body and dialogues with its curves.

Evoking the fabric, the seat leaves its inert state and invites you to a pleasant break of relaxation. Available in three versions (stool, chair and armchair) the HAMAC collection expresses all the charm of the material and responds to a functional aesthetic that combines resistance, strength and elegance. Almost “petrified” by the resin, the linen fiber is transformed into an ultra-performing eco-composite.

Fabrics: Optional seat cushion available to be upholstered in many fabric and leather options

Finishes: FRAME: 60% linen fibers strengthening, 40% resin BASE: wood with metal strengthening Natural Composite Seat available in Matt or Glossy Several Wood finishes

Lead time: Approximately 20-24 weeks from Italy
