

Palmo Sofa By Amura

VOYAGER

Inspired by the natural gesture of an opening hand, Palmo is the new living concept designed by Emanuel Gargano. The folds become the exceptional characteristics of its embracing nature, as an unmistakable sign that takes us back to the roots of our history. The modular elements design the space, taking turns the most classic shapes to the most irregular and free compositions, while the embracing padding softness recalls his warm nature that is always ready to host in the intimacy of its shapes.
